

# JAWAD AHMED

SOFTWARE DEVELOPER

## / ALL ABOUT ME

I am a junior developer with over 3 years of experience in web design and web application development. Recognised for developing bespoke websites that optimise business performance and generate positive customer reviews. I am a fast learner with strong time management and multi-tasking skills. I have enrolled into several courses across a variety of platforms to aid my knowledge in computer science, Udemy being the most commonly used in which I was able to pick up the basics of Python & C#. Additionally, I have used YouTube, Skillshare and Treehouse to learn HTML, CSS and JavaScript and am comfortable coding in these languages. They have all widened my perspective in programming as I am being taught from different angles, benefiting my learning and understanding.

## / AREAS OF EXPERTISE

- >> **Git & Github**
- >> **Basics of Testing**
- >> **IDE's & Text Editors**
- >> **Computer Networks**
- >> **Programming Languages**
- >> **Data Structures & Algorithms**
- >> **Object Oriented Programming**
